Montoursville, PA 17754

Appellation Pre-Fab, (hereafter APF), was founded in 2009 and is based in Montoursville, PA where our corporate headquarters is located. Our Palmer location in Williamsport PA houses our 15-acre facility with an 120,000 square foot fabricating area and our sandblasting and coating machinery.

Although our name is fairly new to the industry, we have many years of experience in the pipeline fabrication industry meeting safety, schedule and budget requirements.

We have employed up to 260 employees at one time when we had multiple large projects in process.

We average 125 employees during normal workload times.

We are dedicated to being the only company in the industry with a 100% x-ray quality backed by a 100% guarantee. Our welders are held to strict quality control standards to guarantee superior quality.

APPELLATION

QUALITY ASSURED PRE-FAB

Our fabricators and work force are highly skilled and trained in fabrication and construction of piping projects incorporating ASME B31.3 and API 1104 welding procedures with the addition of ASME Stamps, U, R, and S,. Our capabilities allow us to design, build, fabricate, and repair high pressure vessels and piping up to 5000 PSI and unlimited wall thickness.

APF employs some of the best fabricators and welders in the industry. We utilize a Project Management team that is dedicated to procurement, installation, and completion of projects including Compressor Stations, Meter Stations, Wellpad Piping, Pipelines, and Dehydration Equipment. We feel we have organized a team of competent and experienced Compressor Station and related piping professionals to complete your project according to your specifications.

Currently APF holds Master Service agreements with all of the leading energy and pipeline companies throughout PA, NY, and WV including PVR (Regency), Anadarko, Chief, Shell, Williams, Dominion, Transco, Columbia, NiSource, Inergy (Crestwood), National Fuel Gas, UGI, and many others. In addition, we are aligned to work with The Pike Company where needed for Construction Management on large projects.

Collectively, our workforce was responsible for building numerous Compressor Stations which include:

- PVR /Regency Midstream—Quaker Compressor Station, Barto Station, Canoe Run Station, Hirkey Station, and numerous metering stations in addition to launchers and receivers
- Williams Transco—numerous hot tap locations, fabrication, and pipeline installations
- Dominion Transmission—Greenlick to Little Greenlick jumper lines (Renovo, PA)
- Atlas Energy—Atlas pipeline (Cascade, PA)
- Columbia Gas NY—Hancock Compressor Station greenfield project of 15000 HP turbine
- Talisman/Fortuna Energy—Pipeline and well site installations (Southern Tier NY, Northern Tier, PA)
- El Paso/Tennessee Gas Pipeline—Numerous tie-ins and related piping (PA)
- Laser Gathering - Dunbar Compressor Station (Windsor, NY)
- Anadarko Petroleum - Stations 285, 289, 231 (Lycoming County, PA)
- Williams—Teel Compressor Station upgrades (Susquehanna, PA)
- Cabot/Williams—Lathrop Compressor Stations upgrades—Susquehanna, PA

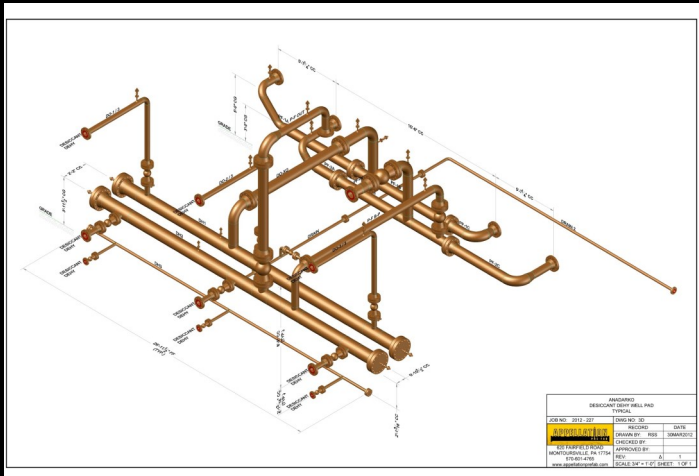

These are just a few of the most recent out of hundreds of projects our workforce has been involved with throughout

We would be happy to offer references on request.

Drafting and Construction Documentation

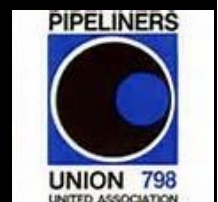

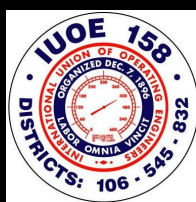

Drafting and Construction Documentation

Our drafting department has full design, scanning, and printing capabilities. The department is staffed with experienced, knowledgeable, and highly skilled trades people, using the most current software for both 2D and 3D design work. They have decades of “hands on” experience installing, manufacturing and erecting the most complex systems, including structural steel and all types of oil and gas piping systems.

We can produce precise, detailed fabrication drawings from your construction drawings and specifications. Potential flaws in design can be identified early, before the project is fabricated, avoiding costly changes which would require corrections onsite. This ensures what is fabricated in the shop will work in the field, optimizing labor, time, dollars, and other resources.

APF strongly supports the quality of union work. We exclusively utilize trained and skilled Union employees to facilitate the procurement of a qualified labor force to meet the requirements of any contract through numerous national and local agreements.

CHAPIN DEHY STATION

APF prides itself on employing highly skilled tie-in welders and pipeline repair crews with experience in repairing natural gas/oil pipeline and related assemblies on a regular basis. We understand how critical pipeline repair is and the safety measures that must be taken. Safety is always our number one priority.

As we are located in the Williamsport, PA area, we are in the heart of the Marcellus Shale natural gas formation and can assemble a crew immediately to repair your pipeline. With our 100% guarantee, you can be assured that your pipeline repair will be done safely and to perfection.

FABRICATION

We fabricate all piping assemblies of an industrial nature. APF can fabricate piping from 2-inch up to 42-inch for meter/valve stations, compressor/pump stations, and launchers/receivers. Our welders, journeymen, and pipeline fabricators/welders are knowledgeable and experienced in their trade and we stand behind their work with a 100% guarantee.

INSTALLATION

APF is conveniently located in the heart of the Marcellus Shale natural gas formation, near Williamsport, PA. We can mobilize a workforce for pipeline installation within 48 hours. APF employees are field-tested and trained specifically in the natural gas and oil industry. After we fabricate your piping system, we will ensure the installation is done to perfection and always on time.

Throughout the years, our workforce has proven there is no substitute for skilled craftsmen. We value the beauty of our area and follow all local environmental codes during installation to protect our natural resources. We strive to go "above and beyond" in meeting your expectations.

APF offers Pre-Hydro testing of your piping assemblies-

- ♦ Reducing labor and safety factors on well site locations.
- ♦ Allowing for faster installation times.
- ♦ Meeting your company's specifications and expectations.
- ♦ Providing documentation for your records.

SANDBLASTING, PAINTING & COATING

- * Blasting, painting and SP-28-88 applied coatings.
- * Featuring the only Roto-Blast machine in the area that is capable of blasting hundreds of feet a day therefore reducing your labor costs.
- * Included on our 15-acre facility, we have a 20' by 18' by 60' fully enclosed blast cabinet capable of handling large assemblies.
- * We can assemble field crews for on-site blasting/ painting, and coating to our customer's specifications.
- * Workforce with over eighteen years of experience in industrial painting applications.

APPELLATION PRE-FAB STAFF & EXPERIENCE

PRINCIPAL NAMES

William Lee Emick, Jr.

CEO

- ◇ Bachelor of Science in Weld Engineering
- ◇ Associates Degree in Weld Fabrication
- ◇ Certificate in Welding Technology

Gregory Galante

Vice President/General Manager

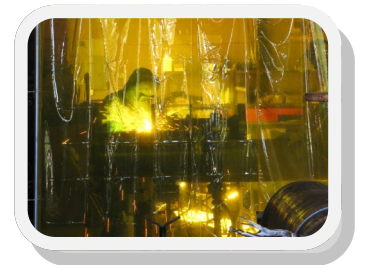

- ◇ Over 30 years in construction experience
- ◇ Management of multi-million dollar projects
- ◇ Over 30 years in Project Management and Estimating

Westley Smith

Senior Project Manager

- ◇ Bachelors Degree in Welding and Fabrication Engineering Technology
- ◇ Associate Degree in Welding Technology
- ◇ Certificate in Welding
- ◇ AWS Certified Welding Inspector
